2026 CCR REPORT for 2025 AVAILABLE

The 2026 Consumer Confidence Report for 2025 testing is now available. It will not be mailed, however it can be viewed by going to:

<https://wcirwa.com/ccr1>

You can also find the CCR report on our web site: wcirwa.com (under the forms and reports) OR a paper copy can be requested by calling 712-655-2534 or email us at info@wcirwa.com

What is a Consumer Confidence Report?

What is a Consumer Confidence Report? The U.S. Environmental Protection Agency (EPA) requires community water systems, such as West Central Iowa Rural Water Association, to prepare and make available an annual drinking water quality report to our customers. These reports are called "Consumer Confidence Reports" (CCR). We are pleased to report that our drinking water is safe and meets federal and state requirements. These reports show your water quality and what it means. Drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. The presence of these contaminants does not necessarily indicate that water poses a health risk.

Thank you for allowing us to continue providing your family with clean and quality drinking water.

Sign up for Paperless Billing & ACH

Water Account#: _____ Email: _____

Name: _____

Service Address: _____

Type of Account: Checking or Savings Name of Bank: _____

Routing #: _____ Account #: _____

This authorization will remain in effect until canceled by either party. I agree to notify West Central Iowa Rural Water Association as soon as possible if my bank account information changes. I agree that if sufficient funds are not available in the above bank account to allow the bank to automatically process payment of the outstanding balance on my monthly water, I will pay West Central Iowa Rural Water Association, by cash or money order, the outstanding balance plus a returned check fee.

Signature: _____

All autopay withdrawals happen on the 5th of each month. You may also email our office at info@wcirwa.com or call 888-844-2614 to sign up for Paperless Billing or ACH.

Annual Membership Meeting Held March 19

The 2026 Annual Meeting of the Membership was held on Thursday, March 19 @ 6PM at the Aspinwall Community Building. Board President Steve Willenborg greeted the members and special guests. The financial report was given by Justin Schaubroeck of FORGE Financial & Management Consulting. Manager Jason Meredith reported that we sold almost 700 million gallons of water in 2025. Meredith also spoke about the completion of the new Boyer Plant near Lake View and well exploration on our Nishnabotna system. An election for three board members was held with the names of Steve Willenborg, Sean O'Neill and Allan Sander elected as directors to serve for a term of three years.

Our Community Connect is the WCIRWA payment portal. This portal allows you to see your current statement as well as account statement history. You can also pay by credit or debit card and e-check please check out the portal at: <https://wcirwa.ourcommunityconnect.com>.

Meter pits will be checked this summer. Please remember to clear the pit of any debris, flowerpots and decorative items.

MANNING | JULY 23-26, 2026

IKM-MANNING HIGH SCHOOL - 209 10th St., MANNING, IA

Important Reminder on cross connections

We would like to remind our members that no other present or future source of water should be connected to any water lines served by WCIRWA, such as well lines.

Any member with a cross-connection will be responsible for any usage, damages or health and safety of WCIRWA members.

Should you utilize your private well, you MUST have a physical break between the water sources.

Water Quality FAQs

Discolored tap water is usually caused by iron sediment or rust being disturbed inside water pipes. The main causes include sudden water pressure changes, water main breaks, hydrant flushing, or routine maintenance, which dislodge natural deposits. While it often clears on its own, it can stain laundry or dishes.

Key Reasons for Discolored Water:

- **Pipeline Disturbance:** High demand, firefighting, or maintenance causes sediment (iron and manganese) settled on the pipe walls to stir up.
- **Main Breaks/Repairs:** Breaks or construction cause sudden pressure changes that send rusty water to homes.
- **Aging Pipes:** Older municipal pipelines and home service lines made of cast iron or galvanized steel corrode, releasing rust into the water.

What to Do:

1. **Stop using hot water:** This prevents drawing discolored water into your water heater.
2. **Run cold water:** Run the cold water from a low faucet (like a bathtub or exterior hose bib) for 15-30 minutes to clear the lines.
3. **Wait:** If it doesn't clear, wait an hour and try again.

If the water remains discolored after several hours, contact our office at 1-888-844-2614 to report a possible main break or issue.
